## Interview with Visiting Scholar

---

### Visiting Scholar: Dr. Hiroshi Miyashita

Associate professor of law at Chuo University, Tokyo, Dr. Miyashita, was a Visiting Scholar at the Brussels Privacy Hub in April and May 2016. He will shortly publish a working paper as part of the Hub's Working Paper Series. We asked him some questions about his visit:

#### What brought you to Brussels and, more specifically, to the Brussels Privacy Hub?

The EU has been the leader of the data protection community all over the world and affects Japanese stakeholders through the “Brussels effect”. It is essential to learn from the EU data protection experts in Brussels why they respect data protection as a fundamental right with the new GDPR. At the same time, it is also important to export the Japanese cultural value of privacy to the EU experts to build bridges between the two. The Brussels Privacy Hub entails an open and active academic community with diverse experts, where I could achieve my academic goal.

#### What were you hoping to get out of your visit?

My hope was to find the convergence of EU-Japan data protection regimes after I wrote a chapter "A Tale of Two Privacies" in *Enforcing Privacy*. At the same time, I was interested in the GDPR and its possible impact on Japanese stakeholders. After the amendments of the Japanese Data Protection Act in 2015, I planned to study, with the EU experts' assistance, how close we had come to the EU legal regime and what more we should do catch up.

#### What were some highlights of your visit?

It was a full of pleasant memories: the working paper discussions with professors, lunch with the professors and researchers, visiting EU institutions, and, of course, the beautiful cities with the unexpected clear weather. Among them, the most exciting event was the EU-Japan Data Protection Workshop. We had stimulating discussions with the panelists and continuous questions from the audience. At this time, I feel that the Brussels Privacy Hub is the intellectual capital of data protection in the world.

#### How has your visit changed your view on data protection in Europe as compared to in Japan?

I found that we had many more similar aspects of law and practice than differences. Nonetheless, the Japanese approach is still mostly to use soft power through a social norm of privacy. We should learn not just the legal text or languages, but also the EU data protection philosophy of hard power, such as the DPA's role and law enforcement.

#### Are you planning on future collaboration between the Hub and your home institute?

My stay in Brussels was the first step for future EU- Japan collaboration. I hope we will build clear privacy bridges between Brussels and Tokyo in the future. I personally express my special thanks to Professor Christopher Kuner for his hospitality and academic friendship.

## Recent Events

---

### ICRC Workshops • Data protection in humanitarian action

---

**13 and 14 June, 2016** • The Hub hosted two full-day workshops in Geneva in partnership with the International Committee of the Red Cross. The workshops considered the data protection implications of the use of biometrics and mobile cash in humanitarian action. We were pleased to welcome UN Special Rapporteur on the right to privacy, Joseph Cannataci, to speak at the workshops (pictured above).

### GDPR Workshop Series • The GDPR and the European Data Protection Board

**18 May, 2016** • The Hub hosted a workshop on the implementation of the GDPR and the role of the European Data Protection Board.

This was part of the BPH Workshop Series on the Implementation of the GDPR. The workshops bring together academics, officials of EU institutions, data protection authorities and NGOs.

## GDPR Workshop Series • Freedom of Expression and Data protection in the GDPR

**16 June, 2016** • The Hub hosted a successful workshop on the implementation of the GDPR and freedom of expression. The discussion focused largely on the "right to be forgotten".
