

Support training activities on the data protection reform (STAR) – Final Conference

Thursday, 17 October 2019, 12:00 – 14:30

U-Residence, Vrije Universiteit Brussel
1050 Brussels

Description of the event:

This event will introduce and discuss the final results of the STAR project (co-funded by the European Union (EU) under its Rights, Equality and Citizenship programme (2014-2020)) which supports training activities of EU Data Protection Authorities (DPAs) and Data Protection Officers (DPOs) on the EU data protection reform, and especially on the General Data Protection Regulation (GDPR). The panel will identify the challenges and best practices around data protection training. The panel will then launch the ready-made, easy-to-customise and easy-to-run training materials, (i.e. 11 Microsoft PowerPoint presentations, training scenarios, further supporting forms as well as a handbook for trainers and users of the materials) targeted for DPAs and DPOs and which are freely and publicly available in a digital form at the project's website: <http://www.project-star.eu/training-materials>. During the event speakers will guide the audience through the STAR materials and, in form of a discussion, gather their feedback and experience from training activities thereafter.

Preliminary registration required in order to allow the audience to familiarize themselves with the STAR materials prior to the event.

Participants

1. **István Böröcz**, Vrije Universiteit Brussel (VUB) – Research Group on Law, Science, Technology & Society (LSTS)
2. **David Barnard-Wills**, Trilateral Research Ltd. (TRI)
3. **Júlia Sziklay**, Nemzeti Adatvédelmi és Információszabadság Hatóság (NAIH)
4. **Gábor Kulitsán**, Nemzeti Adatvédelmi és Információszabadság Hatóság (NAIH)

Proposed agenda

12:00-12:30 Arrival, registration, light lunch

12:30-13:15: Introduction of the STAR project and the STAR materials

Short description: STAR partners introduce the project to the audience with special attention to its rationale, stages, and outcomes. The panel will identify the challenges and best practices around data protection training. The panel will then launch the ready-made, easy-to-customise and easy-to-run training materials, (i.e. 11 Microsoft PowerPoint presentations, training scenarios, further supporting forms as well as a handbook for trainers and users of the materials) targeted for DPAs and DPOs.

13:15-14:30 Q&A with the audience

Short description: The attendees will be requested to familiarize themselves with the STAR training materials. The goal of this Q&A sessions is not only to share experience among trainers but to discuss, how the STAR materials can ameliorate training activities.
